

Zero eDiscovery

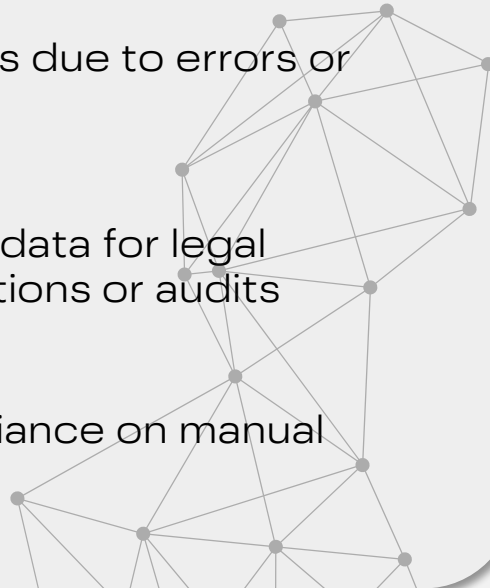

A new name in corporate investigations

2025

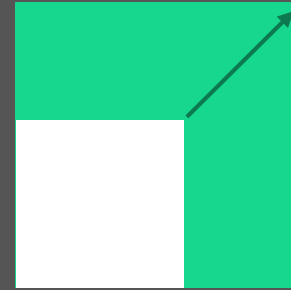

Your challenges – our solutions

What problems do our clients most often face?

- Huge volumes of data: the complexity of searching, analyzing and classifying
- High legal and financial risks due to errors or omissions
- Long processing times for data for legal cases, corporate investigations or audits
- Lack of automation and reliance on manual processes

OeD

by **68%**

the average eDiscovery project has increased its data volume over the past three years

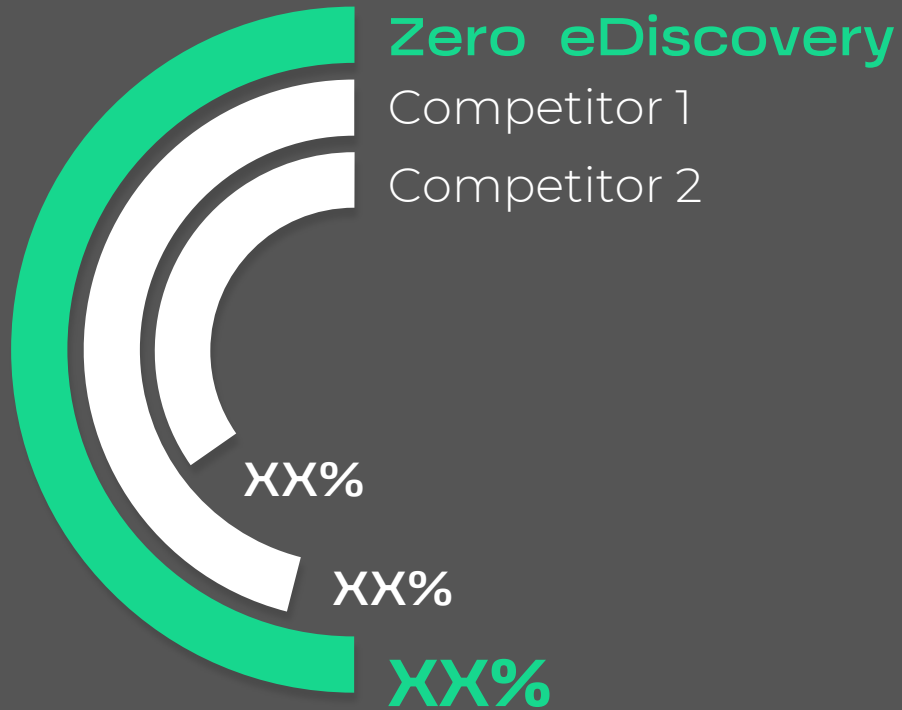

73%

of companies face risks due to outdated data management processes
